**Explanation of Column Headings:**

- o “Founded Intakes” – this is the number of investigations that were determined (founded) to be situations in which maltreatment was being perpetrated by the parents/caregivers.
- o “Children in Founded Investigations” – this is the total number of children (in utero through age 17) who were members of the households counted under “Founded Intakes” (direct victims and indirect victims)
- o “Children with Founded Maltreatments” – this is a subset of “Children in Founded Investigations”—it includes only those children in the household who were determined to be the direct victims of one or more specific founded maltreatments.

**Further clarification through two hypothetical examples:**

1. Example 1--
  - o “Founded Intakes” – because Household A was determined to be abusing/neglecting one or more children in the home, this household is included in the “Founded Intakes” column
  - o “Children in Founded Investigations” – Household A consists of Grandma (age 50), Mom (age 30) and 4 children (ages 4, 7, 9, and 11). Therefore, 4 children are counted in this section.
  - o “Children with Founded Maltreatments” – the 7-year-old has serious disabilities and a report was made by the child’s specialists that medical appts. were not being kept and that the child’s life-support equipment was not being properly used or maintained. Investigation resulted in determination that Mom was medically neglecting this child. However, there did not appear to be any threat of harm to the other children, who did not have serious health issues. Therefore, only the 7-year-old is counted in this section.
2. Example 2--
  - o “Founded Intakes” – because Household B was determined to be abusing/neglecting one or more children in the home, this household is included in the “Founded Intakes” column
  - o “Children in Founded Investigations” – Household B consists of Mom (age 25) and 3 children (ages 2, 5, and 8). Therefore, 3 children are counted in this section.
  - o “Children with Founded Maltreatments” – Investigation resulted in determination of neglect against the mom because of the unsanitary conditions in the home as well as there being little to no food available in the refrigerator or cabinets. In addition, there was no running water present in the home. Because these conditions resulted in harm or threat of harm to all three children, all three are counted in this section.
