During the week of Sept 24-28, 2007 a team of DSS staff from state office and surrounding counties conducted an onsite review of child welfare services in Greenville County. A sample of open and closed foster care and treatment cases were reviewed. Also reviewed were screened out intakes, foster home licensing records, and unfounded investigations. Stakeholders interviewed for this review included foster parents, Greenville DSS supervisors, representatives from the schools, Foster Care Review Board, Mental Health and Guardian Ad Litem Program.

**Period Under Review: September 1, 2006 to August 31, 2007**

**Purpose**

The Department of Social Services engages in a review of child welfare services in each county to:

- a) Determine to what degree services are delivered in compliance with federal and state laws and agency policy; and
- b) Assess the outcomes for children and families engaged in the child welfare system.

State law (§43-1-115) states, in part:

> The state department shall conduct, at least once every five years, a substantive quality review of the child protective services and foster care programs in each county and each adoption office in the State. The county’s performance must be assessed with reference to specific outcome measures published in advance by the department.

The information obtained by the child welfare services review process will:

- a) Give county staff feedback on the effectiveness of their interventions.
- b) Direct state office technical assistance staff to assist county staff with their areas needing improvement.
- c) Inform agency administrators of which systemic factors impair county staff’s ability to achieve specific outcomes.
- d) Direct training staff to provide training for county staff specific to their needs.

**Quantitative and Qualitative Data Sources**

The county-specific review of child welfare services is both quantitative and qualitative.

The review is **quantitative** because it begins with an analysis of every child welfare outcome report for that county for the period under review. The outcome reports reflect the performance of the county in all areas of the child welfare program: Child Protective Services (CPS) Intake, CPS Investigations, CPS In-Home Treatment, Foster Care, Managed Treatment Services (MTS), and Adoptions.

The review is **qualitative** because it assesses the quality of the services rendered and the effectiveness of those services. The review seeks to explain why a county’s performance data looks the way it does.
Ratings
The standard that must be met for all items reviewed onsite is 90%. Each outcome report has its own standard. To be rated an area of **Strength** most items must meet both the qualitative onsite review standard and the quantitative outcome report standard.

Safety Outcome 1: Children are, first and foremost, protected from abuse and neglect.

The county’s performance on this outcome is based on the rating of two items:
1) Timeliness of initiating investigations **Area Needing Improvement**
2) Repeat Maltreatment **Area Needing Improvement**

Agency Data
**Measure S1.1: Timeliness of Initiating Investigations on Reports of Child Maltreatment**
Data Time Period: September 1, 2006 to August 31, 2007
Objective: 100% in <= 24 hours (state law)

<table>
<thead>
<tr>
<th></th>
<th>Number of Determinations</th>
<th>Number of Investigations Initiated Timely</th>
<th>Percent of Investigations Initiated Timely</th>

<td>1,449</td>
<td>99.5</td>
<td>(7)</td>
</tr>
</tbody>
</table>

**Explanation of Item 1: Timeliness of Initiating Investigations of Child Maltreatment**
This is an **Area Needing Improvement** for Greenville DSS. State law requires that an investigation of all (100%) accepted reports of abuse and neglect be initiated within 24 hours. The outcome report indicates that 99.5% of investigations were initiated within 24 hours. Although the agency failed to initiate only seven of 1,456 investigations within 24 hours, reviewers found other problems with how some investigations were initiated. In some instances, when parents were not home, several days passed before a second attempt to initiate contact was made.
Agency Data

**Measure S1.2: Repeat Maltreatment** – Of all children who were victims of indicated reports of child abuse and/or neglect during the reporting period, the percent having another indicated report within a subsequent 6 month period.

**Indicated Report Between September 1, 2006 to August 31, 2007**

**Objective:** ≤ 6.1% (federal standard)

</table>

**Explanation of Item 2: Repeat Maltreatment**

This is an **Area Needing Improvement** for Greenville DSS. This item measures the occurrence of maltreatment among children under agency supervision during the period under review. The federal standard is that less than 6.1% of children experience repeat maltreatment. Agency data suggests that only .17% of the children under Greenville DSS supervision experience repeat maltreatment. However, reviewers found that 40% of the children in in-home treatment cases experienced repeat or on-going maltreatment. Those incidents were not captured by agency data because they did not trigger new reports.
Greenville County DSS  
Review of Child Welfare Services  
September 2007

Safety Outcome 2: Children are safely maintained in their homes whenever possible and appropriate.

The county’s performance on this outcome is based on the rating of two items:

3) Services to family to protect children and prevent removal  
4) Risk of Harm

**Explanation of Item 3: Services to Family to Protect Children and Prevent Removal**

This is an **Area Needing Improvement** for Greenville DSS. This item assesses whether services were adequate to protect children in their home and prevent their removal and placement into foster care. In half of the treatment cases reviewed, families received services needed to ensure the safety of the children who remained with their parents or relatives. In some cases parents were referred to counseling and other services even when the agency had evaluations stating that the parents did not have the intellectual ability to benefit from those services.

**Onsite Review Findings**

**Safety Item 3: Services to Family to Protect Child(ren) in Home and Prevent Removal.**

**Explanation of Item 4: Risk of Harm**

This is an **Area Needing Improvement** for Greenville DSS. This item assesses whether the agency’s interventions reduced risks of harm to children. In several cases staff documented their inability to obtain ex-parte removal orders or have law enforcement EPC children in in-home treatment cases when workers determined that those children were in imminent danger.

**Onsite Review Findings**

Permanency Outcome 1: Children have permanency and stability in their living situations.

The county’s performance on this outcome is based on the rating of six items:

5) Foster care re-entries **Strength**
6) Stability of foster care placement **Area Needing Improvement**
7) Permanency goal for child **Area Needing Improvement**
8) Reunification or permanent placement with relatives **Strength**
9) Adoption **Area Needing Improvement**
10) Permanency goal of Alternate Planned Permanent Living Arrangement (APPLA) **Strength**

**Agency Data**

**Measure P1.1: Foster Care Re-entries** – Of all children who entered care during the year under review, the percent that re-entered foster care within 12 months of a prior foster care episode.

**Objective:** <= 8.6% (federal standard)

<table>
<thead>
<tr>

</tbody>
</table>

**Explanation of Item 5: Foster Care Re-entries**
This is area of **Strength** for Greenville DSS. This item measures the frequency of children re-entering foster care within a year of discharge. The federal standard for this measure is that no more than 8.6% of children entering foster care be re-entries within a year of discharge from care. The percentage of children re-entering care in Greenville is 2.62%.
Agency Data

Measure P1.2: Stability of Foster Care Placement – Of all children who have been in foster care less than 12 months from the time of the latest removal from home, the percent that had not more than 2 placement settings.

Objective: >= 86.7% (federal standard)

<table>
<thead>
<tr>
<th></th>

</tr>
</tbody>
</table>

Explanation of Item 6: Stability of Foster Care Placement
This is an Area Needing Improvement for Greenville DSS. This item measures the frequency of placement changes for children in foster care, and assesses the reasons for those changes. The federal standard for this measure is that at least 86.7% of the children in care have no more than two placements in the past year. Agency data shows that only 77.08% of the children in Greenville DSS had two or fewer placements. Even though, the percentage of Greenville children in care over age 12 (28%) is lower than the county office average (32%). Not all of the agency’s placement instability can be attributed to the older children in care.

Agency Data

Measure P1.5: Permanency Goal for Child – Of all children who have been in foster care for 15 of the most recent 22 months, the percent for which a Termination of Parental Rights (TPR) petition has been filed.

Objective: >= 53% (agency established objective)

<table>
<thead>
<tr>
<th></th>
<th>Children in Care At Least 15 of Last 22 Months Sept 1, 2006 to Aug 31, 2007</th>

<td>43.8%</td>
<td>(32.0)</td>
</tr>
</tbody>
</table>
**Explanation of Item 7: Permanency Goal for Children**

This is an *Area Needing Improvement* for Greenville DSS. This item evaluates the appropriateness of permanency goals for children in foster care and the timeliness of those permanency decisions. To meet the agency objective for this item 53% or more of the children in care 15 of the most recent 22 months must have a TPR petition filed. Only 43.8% of the appropriate cases had TPR petitions filed. Reviewers found that 70% of the children’s cases had appropriate permanency plans. Each of the cases rated Area Needing Improvement continued to have a plan of Return Home when the agency’s history with the families made it clear that the children should not be returned to their parent’s care.

**Agency Data**

**Measure P1.3: Length of Time Until Reunification.** Of all children who were reunified with their parent(s) or caretaker(s) at the time of discharge from foster care, what percentage were reunified in less than 12 months from the time latest removal from home?

<table>
<thead>
<tr>
<th>Objective: $\geq 76.2$ (federal standard)</th>

</tbody>
</table>

**Explanation of Item 8: Reunification or Permanent Placement with Relatives**

This is an area of *Strength* for Greenville DSS. This item evaluates the activities and processes necessary to accomplish the goal of reunification with caregivers or placement with relatives. Agency data indicated that 89.1% of Greenville County children were reunified within 12 months of entering care. That level of performance exceeds the agency objective.
**Agency Data**

**Measure P1.4: Length of Time to Achieve Adoption** – Of all children who exited from foster care during the year under review to a finalized adoption, the percent that exited care in less than 24 months from the time of the latest removal from home.

<table>
<thead>
<tr>
<th>Objective: &gt;= 32% (federal standard)</th>

</tr>
</tbody>
</table>

**Explanation of Item 9: Adoption**

This is an **Area Needing Improvement** for Greenville DSS. This item evaluates the process within the child welfare system to achieve timely adoptions for children in foster care. The federal standard is that at least 32% of adoptions be completed within 24 months of a child entering care. Only 29% of Greenville’s adoptions were completed within 24 months. Reviewers found various reasons for delays in permanency for children with this plan. Some children had been in pre-adoptive placements that disrupted. Some were older children with behavioral disorders that made finding adoptive families difficult.
**Onsite Review Findings**

**Permanency Item 10: Permanency Goal of Alternate Planned Permanent Living Arrangement**

**Explanation of Item 10: Permanency Goal of APPLA**

This is an area of **Strength** for Greenville DSS. This item evaluates the appropriateness and effectiveness of services provided to children with the permanency plan of APPLA. One standard applied to this objective is that no more than 15% of the children in foster care should have this plan. Only 13.8% of the children in the care of Greenville DSS have this plan. Reviewers found that children with this plan were receiving appropriate independent living services.

**Permanency Outcome 2: The continuity of family relationships and connections is preserved for children.**

This outcome is based on the rating of 6 items:

11) Proximity of foster care placement
12) Placement with siblings in foster care
13) Visiting with parents and siblings in foster care
14) Preserving connections
15) Relative placement
16) Relationship of child in care with parents

**Agency Data**

**Measure P2.1: Proximity to Home of Foster Care Placement** – Of all children in foster care during the reporting period (excluding MTS and Adoptions children), the percent placed within their county of origin.

<table>
<thead>
<tr>

</tbody>
</table>
Explanation of Item 11: Proximity of Foster Care Placement
This is an Area Needing Improvement for Greenville DSS. This item evaluates the agency’s efforts to keep children close enough to their families so that essential relationships can be maintained. One measure used to evaluate this item is the percentage of children who are placed within the county. The objective is at least 70% of the children in care be placed within the county. Agency data shows that only 54% of Greenville DSS children were placed within the county. Although the agency is actively recruiting new foster homes, it has only 108 homes to serve the 395 children in care.

<table>

</tbody>
</table>

Explanation of Item 12: Placement with Siblings in Foster Care
This is an area of Strength for Greenville DSS. This item evaluates the agency’s efforts to keep siblings together when it is appropriate to do so. The agency generally did a very good job of placing siblings together. It was less able to keep siblings together when the children experienced a placement change.

<table>
<thead>
<tr>

</tbody>
</table>

Explanation of Item 13: Visiting with Parents and Siblings in Foster Care
This is an Area Needing Improvement for Greenville DSS. This item evaluates the agency’s efforts to ensure that visits occur between children in foster care and their siblings and parents. In the majority of cases (86%) visits occurred according to agency policy. However, the agency fell just short of its 90% objective because, in some cases, siblings placed in different parts of the state because of their therapeutic needs were not given the opportunity to see one another.

**Explanation of Item 14: Preserving Connections**
This is an **Area Needing Improvement** for Greenville DSS. Whereas Item 13 addressed parents and siblings, this item evaluates the agency’s efforts to preserve children’s connections to the people, places and things that are important to them. Caseworkers clearly identified their client’s significant relationships with former teachers, grandparents and other relatives yet failed to make any effort to help their clients maintain those relationships.

Onsite Review Findings

Permanency Item 15: Relative Placement

**Explanation of Item 15: Relative Placement**
This is an **Area Needing Improvement** for Greenville DSS. This item evaluates the agency’s efforts to identify and assess relatives as potential placement resources for children in foster care. Only 29% of the cases reviewed were rated strength for this item. Although relatives were assessed in most (71%) cases, there were lapses. In those cases rated Area Needing Improvement, a single relative was assessed and all others were ignored.

Onsite Review Findings

**Explanation of Item 16: Relationship of Child in Care with Parents**
This is an **Area Needing Improvement** for Greenville DSS. This item evaluates the agency’s efforts to promote a supportive relationship between children in care and their parents, beyond the twice minimum visitation requirement. Reviewers found no efforts by caseworkers to
involve parents in anything other than the minimum two visits per month. This was true even when dealing with pre-school aged children and children transitioning from foster care to home.

Well Being Outcome 1: Families have enhanced capacity to provide for their children’s needs.

This outcome is based on the rating of four items:

17) Needs and services of child, parents and caregivers
18) Child and family involvement in case planning
19) Worker visits with child
20) Worker visits with parents

Explanation of Item 17: Needs and Services of Child, Parents and Caregivers

This is an Area Needing Improvement for Greenville DSS. This item asks two questions: 1) Were the needs of the child, parents, and caregivers assessed, and 2) Did the agency take steps to meet the identified needs? Although more foster care cases were rated Strength for this item than treatment cases, both areas needed improvement. The most common deficiencies were a) failure to address the needs of alternative caregivers, and b) failure to assess non-custodial parents and paramours who were significant persons in the child’s life.

Explanation of Item 19: Worker Visits with Child
This is an Area Needing Improvement for Greenville DSS. This item measures the frequency of caseworker visits with children under agency supervision, and evaluates the quality of those visits. In 35% of the cases caseworkers failed to see the children one or more months. The weakest area was in-home treatment cases, with 50% rated needing improvement. When dealing with sibling groups caseworkers often saw some, but not all of the children monthly.
Explanation of Item 20: Worker Visits with Parents
This is an Area Needing Improvement for Greenville DSS. This item measures the frequency of caseworker visits with parents, and evaluates the quality of those visits. Only 25% of the cases were rated Strength for this item. Caseworkers failed to see the parents of children one or more months during the one-year period under review. In some instances, case records contained no explanation for why the agency did not attempt to involve the fathers of children in care.

Well Being Outcome 2: Children receive appropriate services to meet their educational needs.

21) Educational need of the child

Explanation of Item 21: Educational Needs of Child
This is an Area Needing Improvement for Greenville DSS. This item evaluates the agency’s ability to assess and address the educational needs of children under agency supervision. This was an area of strength for just over half of the cases (67%), which does not meet the agency objective of 90%. Both foster care and in-home treatment cases showed deficiencies in this area. Some cases contained school records indicating that the child was having academic or behavior problems, but contained no evidence that the caseworker attempted to communicate with the school to address those problems. Those lapses were not evident in cases managed by the adoptions office.
Well Being Outcome 3: Children receive adequate services to meet their physical and mental health needs.

22) Physical health of the child
23) Mental health of the child

Explanation of Item 22: Physical Health of the Child
This is an Area Needing Improvement for Greenville DSS. This item evaluates the agency’s ability to assess and attend to the physical and dental health needs of children under agency supervision. Over half of the cases reviewed (55%) were rated an area needing improvement for this item. Both foster care and in-home treatment cases showed deficiencies in this area. In some instances the problem was a failure to assess the need. In other cases, there was no evidence that caseworkers followed up to determine if identified medical needs of children were being addressed.

Onsite Review Findings

Explanation of Item 23: Mental Health of the Child
This is an Area Needing Improvement for Greenville DSS. This item evaluates the agency’s ability to assess and meet the mental health needs of children under agency supervision. Only 63% of the cases reviewed were rated strength for this item. Both foster care and in-home treatment cases showed deficiencies in this area. In some instances there was a failure to assess the mental health needs of the children. However, some of the children had identified behavioral and mental health problems, yet were not receiving services to address those problems.

**Explanation of Item 24: Unfounded Investigations**
This is an Area Needing Improvement for Greenville DSS. This item evaluates the effectiveness of the agency’s investigative process and determines if its decisions were supported by the facts in the cases. The decision to unfound four of the five cases reviewed was not supported by the information in the assessments. Investigations failed to include interviews with all relevant parties. For example, a victim child would be interviewed, but not other children in the home or the day care provider. Law enforcement might be contacted, but not the school or medical care provider.

Screened Out Intakes

**Explanation of Item 25: Screened Out Intakes**
This is an Area Needing Improvement for Greenville DSS. This item evaluates the effectiveness of the process by which the agency screens out reports of incidents that the agency does not have the legal authority to investigate. The county frequently is not using intake dictation to clearly support its decision to screen out reports of abuse and neglect. This resulted in a rating of Cannot Determine for four of the 10 intakes reviewed. One case was inappropriately screened out because the worker used the wrong name in the CAPSS search and found nothing. However, there was a history, which, along with the current allegation, should have caused the agency to investigate.
Foster Home Licensing

**Explanation of Item 26: Foster Home Licenses**

This is an area of **Strength** for Greenville DSS.

1. Quarterly visits are consistently done and all relevant issues are addressed during those visits.
2. There are no expired licenses.
3. Foster parent training hours are up-to-date.
4. CAPSS documentation is consistent with documentation in the paper file.
5. Some records show that foster children are occasionally cared for by family members who have not been assessed by the agency.
