

Local interagency staffing teams identify the foster children who have significant **emotional or behavioral issues**, requiring them to need a therapeutic placement and special services paid with **ISCEDC funds** (funds which are provided from several state agencies). These youth are usually case managed by an SCDSS Intensive Foster Care and Clinical Services (IFCCS) Office and may require contract support. The chart below tabulates the placement type for each ISCDEC eligible youth in July 2020.

*NOTE: In addition to the ISCEDC Eligible youth reported below, the IFCCS Offices also provide managed treatment services for additional youth who require special services, but who do not meet the strict requirements for being ISCEDC eligible (for additional details, see the "ISCDEC Eligible Youth by Year" report).*
